

PERFORMANCE BASED

ClearPlus[®] Signature Series uses a robust frame (superstructure and secondary links) made from high grade steel. Its aerodynamic design and wide spaced wind channels prevent **ClearPlus[®]** Signature Series blades from losing contact at high speeds with the highly curved windshields of today's cars. Triple coated paint quality allows rust protection and resistance to road salt and other corrosive highway chemicals.

All metal-to-metal contact points in **ClearPlus[®]** Signature Series frames are secured with copper rivets for durability (vs. plastic locks), a feature typically found only in O.E. wiper blades. Additionally, at all such contact points, strong poly bushing prevents noise, excessive play or rust.

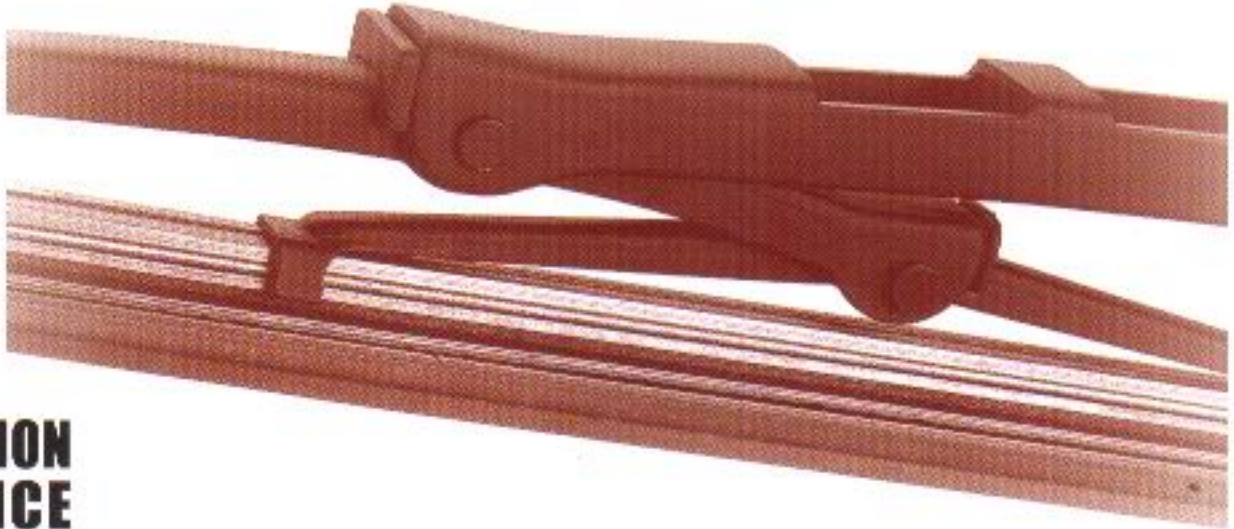

ClearPlus[®] Signature Series rubber element has been developed using German technology. Coated with graphite, it allows for smooth, streak and chatter free wiping in both directions. While retaining softness for the quality of wipe, the rubber element can withstand severe temperature changes.

Strict quality protocols have been established for **ClearPlus[®]** Signature Series production. In-process and pre-factory shipment quality audits are performed to maintain these standards.

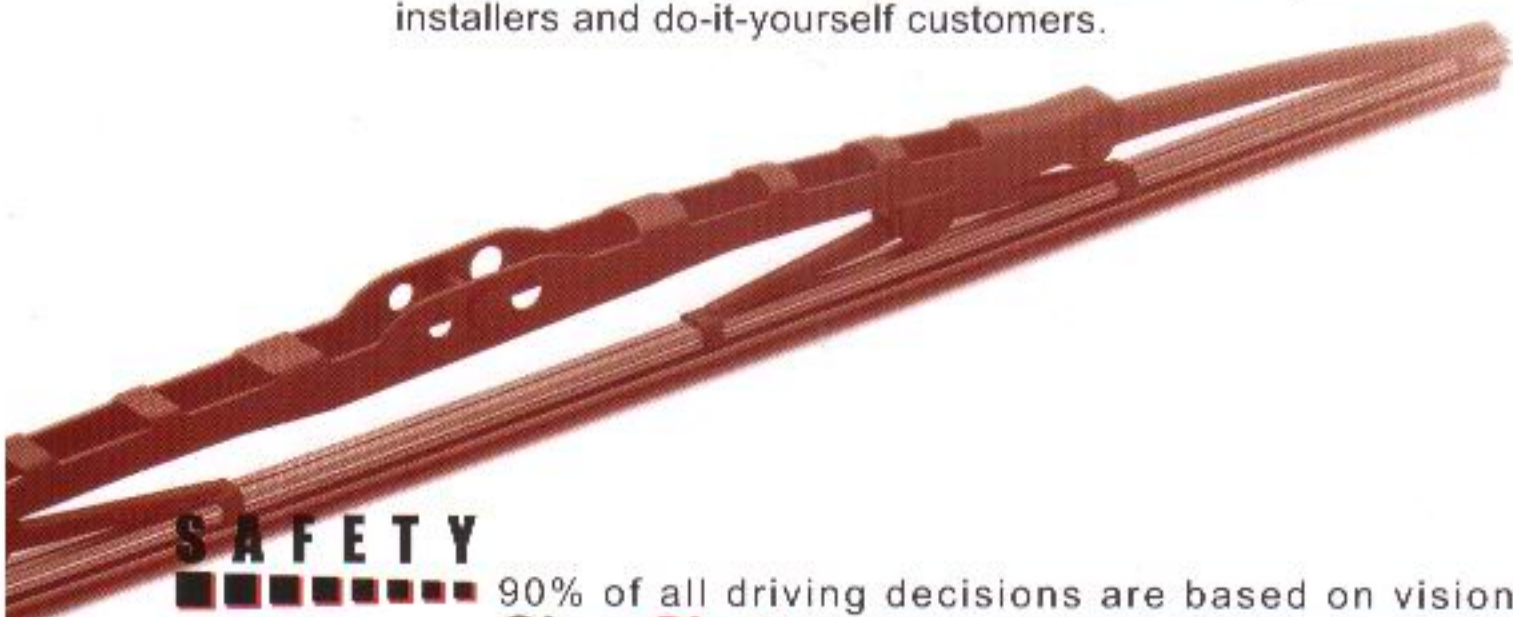

Superior grade stainless steel flexors allow even pressure distribution along the windshield surface and enhance the quality of wipe.

INSTALLATION EXPERIENCE MADE EASY

ClearPlus[®] Signature Series features our newly designed adapter assortment which optimizes ease-of-installation with number of SKUs required to cover the full range. Between sizes 11" to 28", **ClearPlus**[®] Signature Series features only 12 SKUs, each packaged with adapters that are easy to identify and use. Compared to other National Brands, (that require between 25-40 SKUs to complete the range), **ClearPlus**[®] Signature Series minimizes inventory and maximizes profits while maintaining the ease-of-installation for professional installers and do-it-yourself customers.

SAFETY

90% of all driving decisions are based on vision. **ClearPlus**[®] Signature Series has been designed keeping consumer safety in mind. As proven in independent test lab results, it exceeds all National Highway Traffic Safety Standards for wiping performance, durability of mounting hardware and rubber, and ozone resistance.

PACKAGING

High end packaging graphics and product performance claims are important influences on retail customer purchase decisions. Retail packaging for **ClearPlus[®]** *Signature Series* has been designed keeping this in mind.

Volume Installer Pack (V.I.P.) program is available for the professional installer market. Each pack holds 10 blades wrapped individually in plastic bags. Header cards allow the blades to be hung (and displayed) on peg board hooks or racks if desired. With its cost effectiveness, V.I.P. program enhances profits for the installer segment.

For both retail and installer packs, merchandise displays and other promotional materials are available.

COVERAGE

ClearPlus[®] *Signature Series* is available in sizes 11, 13, 15-22, 24 and 28 in universal adapter assortments that cover almost all domestic and import vehicles on North American roads.

Feature-by-feature, **ClearPlus[®]** *Signature Series* compares favorably to all leading national brands and brings significantly more to your bottom line.

Undeniably, **ClearPlus[®]** *Signature Series* is a product positioned to succeed.

..... **ClearPlus[®]** *Signature Series* is a registered trademark of Advantage Asia.
