

# ClearPlus Winter Blades

One adapter allows mounting 95% of the arms in use on North American cars.

Designed with heavy duty steel structure, ClearPlus winter blades use a large profile molded squeegee made with dual compound, graphite coated rubber.

All steel mounting saddle allows easy installation using only one adapter for the following arm types: Hook arms (both 1/2" and 3/4'), Pin arms (both 1/4" and 3/16") and bayonet arms.

All steel frame structure encased in heavy duty rubber boot withstands snow and ice build-up for safe driving in wintry conditions.

Large profile, dual compound, graphite coated molded rubber squeegee withstands exposure to salt, snow, sleet and ice.
